

Partnership between DELTA DRONE and INSAVALOR In the field of training and certification.

Lyon, 3 September 2015

Delta Drone and its subsidiary, the Ecole Française du Drone - EFD, French leader in civilian drones for professional use, and INSAVALOR, the continuing-education body of the INSA (National Institute of Applied Sciences) in Lyon announce the signature of two major collaboration agreements.

The first concerns the joint creation of a training program in building thermography by drones, with the EFD providing its know-how in piloting remote-controlled aircraft and INSAVALOR its acknowledged expertise in thermography. The first sessions are scheduled for November 2015.

The second concerns the creation of the first Professional Certification for remotely controlling drones in accordance with FFP (Vocational Training Federation) standards, and issued by INSAVALOR. This prestigious and independent certification validates the training given by the EFD experts. It guarantees the quality and respect of the programs, allowing for the optimal acquisition of skills.

This new partnership shows the Ecole Française du Drone – EFD’s desire to provide its trainees not only the most complete training curriculum available, but also top-level educational services.

The Ecole Française du Drone – EFD currently has locations in Lyon, Paris, Toulouse, Montpellier (partnership with ESMA – Ecole Supérieure des Métiers de l’Aéronautique) and Nantes (partnership with Minigroup). Its educational program represents a maximum of 131 training hours, in the form of e-learning, in-person training seminars and in-the-field support. The EFD also offers additional training courses specific to certain activity sectors, such as mines & quarries and audiovisual. A large portion of the training programs focuses on regulations, safety rules and risk prevention.

About INSAVALOR: Created in 1988, INSAVALOR is the Research & Development, Actualization and Continuing Education of INSA Lyon. An active promoter of INSA Lyon’s research, INSAVALOR facilitates relations between the laboratories and the companies looking for technological, skills and training solutions for their innovative projects.

About Delta Drone: The Delta Drone Group is a renowned player in the field of civilian drones for professional use. It offers a complete service, from data acquisition to data processing through a specifically developed information system, including a supply of professional pilots. These pilots are trained and certified by the Ecole Française du Drone, a subsidiary of the Group.

Delta Drone is listed on the Alternext market of Euronext Paris – www.deltadrone.com
ISIN code: FR0011522168.
